Hi Stanley,

We updated the markup for the Treatments Tab to reflect the change below. It is now live on <https://www.cdc.gov/coronavirus/2019-nCoV/index.html> .

Thanks,

Scott

Hey Scott,

My mistake – can you please add the highlighted content back in to the Treatments Tab at the bottom?

Treatment Tab (under Medical treatments)

Treatments used for COVID-19 should be prescribed by your healthcare provider. People have been seriously harmed and even died after taking products not approved for COVID-19, even products approved or prescribed for other uses. Your healthcare provider will decide on what approach to take for your treatment.

Your healthcare provider also may recommend the following to relieve symptoms and support your body's natural defenses.

- Taking medications, like acetaminophen or ibuprofen, to reduce fever.
- Drinking water or receiving intravenous fluids to stay hydrated.
- Getting plenty of rest to help the body fight the virus.

If someone is showing emergency warning signs, get medical care immediately. Emergency warning signs include:

- Trouble breathing
- Persistent pain or pressure in the chest
- New confusion
- Inability to wake or stay awake
- Bluish lips or face

Subject: RE: Google Knowledgebase Update

Hi Stanley,

Were there any problems with these changes? We haven't seen any feedback or seen these updates reflected in the Knowledgebase.

If there were problems let me know and I'll work to address them.

Thanks,

Scott

Subject: RE: Google Knowledgebase Update

Hi Stanley and company,

We have made the following edits to the JSON+LD markup for the knowledgebase.

Prevention Tab

To help prevent the spread of COVID-19:

- Wear a mask to protect yourself and others and stop the spread of COVID-19.
- Stay at least 6 feet (about 2 arm lengths) from others who don't live with you.
- Avoid crowds and poorly ventilated spaces. The more people you are in contact with, the more likely you are to be exposed to COVID-19.
- Get a COVID-19 vaccine when it's available to you.
- Clean your hands often, either with soap and water for 20 seconds or a hand sanitizer that contains at least 60% alcohol.
- Avoid close contact with people who are sick.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Clean frequently touched objects and surfaces daily. If someone is sick or has tested positive for COVID-19, disinfect frequently touched surfaces.

- Monitor your health daily.

Treatment Tab (under Medical treatments)

Treatments used for COVID-19 should be prescribed by your healthcare provider. People have been seriously harmed and even died after taking products not approved for COVID-19, even products approved or prescribed for other uses. Your healthcare provider will decide on what approach to take for your treatment.

Your healthcare provider also may recommend the following to relieve symptoms and support your body's natural defenses.

- Taking medications, like acetaminophen or ibuprofen, to reduce fever.
- Drinking water or receiving intravenous fluids to stay hydrated.
- Getting plenty of rest to help the body fight the virus.

These are live, <https://www.cdc.gov/coronavirus/2019-nCoV/index.html>.

Thanks,

Scott
